TOP 5 TERRITORY

1. Product Performance Gap

Current:

- Pepsodent (₹42,126) leads sales and profit.
- Cello Pen & Lux perform well but still have untapped sales potential.
- Print Paper has very low sales & profit.

Potential:

- If Lux and Cello Pen could match Pepsodent's sales volume, total profit would rise by ~₹30K–₹40K.

Gap & Action:

- **Gap:** Uneven sales distribution among products.
- **Action:** Push mid-performing products (Lux, Cello Pen) with targeted promotions, bundling, or discount schemes.

2. Region Performance Gap

Current:

- South = Highest profit (₹36,871.75).
- North = Lowest profit (₹21,916.5).

Potential:

- If North matched South's profit per unit sold, overall profit would increase by ~₹15K.

Gap & Action:

- **Gap:** ~41% difference in regional profitability.

- **Action:** Replicate South's successful campaigns in North. Check supply chain, pricing, and product availability in weaker regions.

3. Monthly Profit Gap

Current:

- February peaks (~~₹42,376), other months are much lower (~~₹13K–₹22K).

Potential:

- If other months matched February's performance, annual profit could rise by ₹100K+.

Gap & Action:

- **Gap:** Seasonality not fully leveraged — sales spike only in one month.
- **Action:** Run high-promotion events in off-peak months, replicate Feb marketing mix.

4. Territory Contribution Gap

Current:

- Bangalore & Bishnupur dominate (~26% and 25%).
- Kochi, Warangal, and Delhi each ~17–20%.

Potential:

- If smaller territories matched Bishnupur's share, total revenue could increase ~20–25%.

Gap & Action:

- **Gap:** Underutilized territories with sales lagging behind leaders.
- **Action:** Focused sales pushes, local promotions, and community engagement in underperforming areas.

5. Cost vs. Profit Gap

Current:

- Total Sales: ₹1,945,740
- Total Cost: ₹765,236
- Profit: ₹120,845 — which is **only 6.2%** of sales.

Potential:

- Many industries aim for 10–15% net profit.

Gap & Action:

- **Gap:** ~4–9% profit margin gap.
- **Action:** Negotiate supplier prices, reduce low-margin products, and cut operational costs.

1. Department Work Hours Gap

Current:

- Highest: Police (45 hrs), Parks & Recreation (32 hrs), Public Works (23 hrs).
- Lowest: Technology & Innovation, Airport, Community Development (5–6 hrs).

Potential:

- If underworked departments contributed closer to the average (~19 hrs), workload would be more balanced and productivity higher.

Gap & Action:

- **Gap:** Uneven workload distribution; some departments are overburdened (Police), others underutilized.
- **Action:** Cross-train staff to redistribute workload, automate admin-heavy tasks in high-hour departments.

2. Employee Age Distribution Gap

Current:

- Police (45), Parks & Recreation (32) have the highest number of aged employees.
- Technology, Airport, and Community Development have fewer (5–6).

Potential:

- Risk of high retirement rate in Police & Parks over the next years.

Gap & Action:

- **Gap:** Aging workforce in critical roles, potential skill shortage ahead.

- **Action:** Start succession planning and recruit younger employees for Police and Parks & Recreation roles.

3. Category Workforce Gap

Current:

- Protective Services (158) and Professionals (123) dominate workforce size.
- Categories like Skilled Craft (8), Technicians (11), Officials/Admin (8), and Multi-role (0) are underrepresented.

Potential:

- Smaller categories may lead to bottlenecks if demand for specialized skills rises.

Gap & Action:

- **Gap:** Low manpower in technical and specialized categories.
- **Action:** Targeted recruitment and upskilling programs for Skilled Craft and Technical staff.

4. Salary Count Gap

Current:

- Highest salary counts in Protective Services (60), Professionals (40).
- Lowest in Multi-role (0), Officials & Administrators (2), Skilled Craft (8).

Potential:

- Salary gaps could be linked to underutilization of certain roles.

Gap & Action:

- **Gap:** Pay structure imbalance — may cause dissatisfaction or retention issues in smaller categories.
- **Action:** Review pay competitiveness in low-count categories to attract talent.

5. Cross-Department & Category Alignment Gap

Current:

- High-hour, high-aged departments (e.g., Police, Parks) overlap with categories that already have high staff numbers (Protective Services).
- Other categories with low staffing are in departments with low hours.

Potential:

- Work can be reallocated to match skill sets more efficiently.

Gap & Action:

- **Gap:** Mismatch between where hours are spent and where skill shortages exist.
- **Action:** Restructure team allocations to avoid burnout in heavy-load departments and make better use of underloaded ones.

Jan Feb Mar Apr Jun Jul

1. Monthly Sales Performance Gap

Current:

- Best month: **Feb** – ₹28,000
- Worst month: **Apr** – ₹9,840
- Sales drop sharply after Feb (line chart shows big fall from Feb → Mar).

Potential:

- If all months matched Feb's sales, total sales could increase by over 60%.

Gap & Action:

- **Gap:** Seasonal performance inconsistency.
- **Action:** Study why Feb is high (promotions, season, campaigns) and apply similar strategies to low months like Apr, Jul, and Mar.

2. Product Sales Gap

Current:

- Pepsodent = 47% of total sales value (dominates).
- Print Paper = 19%, Dettol = 18%, Cello Pen = 10%, Lux = 6%.

Potential:

- If smaller products doubled their sales share, reliance on Pepsodent could reduce and risk would spread.

Gap & Action:

- **Gap:** Over-dependence on one product.
- **Action:** Run cross-selling campaigns and bundle smaller-selling products with Pepsodent to boost share.

3. Regional Sales Gap

Current:

- South leads: ₹616,385
- North lowest: ₹314,730 (49% less than South).

Potential:

- If North matched South's sales, total revenue could rise by ₹300K.

Gap & Action:

- **Gap:** Uneven regional sales distribution.
- **Action:**
    - Investigate why South is strong (pricing, distribution, store density).
    - Apply similar approach in North.
    - Boost marketing spend in low-performing regions.

4. Sales Trend Stability Gap

Current:

- Sales trend is unstable — sudden high in Feb, then sharp drop, then low fluctuations.

Potential:

- A stable sales flow would help with inventory planning and cash flow.

Gap & Action:

- **Gap:** Lack of continuous demand generation.
- **Action:** Spread promotions across months instead of concentrating them in one period.

5. Low Product-Region Penetration

Current:

- Data suggests top products may be performing well only in certain regions (not visible here but implied by dominance of South/East).

Potential:

- Expanding product reach to underperforming regions could boost both product and region sales.

Gap & Action:

- **Gap:** Product popularity not evenly spread geographically.
- **Action:** Region-targeted campaigns for weaker products in strong markets and vice versa.
